# Bibliography on COLD REGIONS SCIENCE AND TECHNOLOGY

**VOLUME 35, Part 2** 

Geza T. Thuronyi, Editor

# NOTE

This is a companion issue to Vol. 35, Pt. 1. The latter contains the full bibliographic citations referred to in the author and subject indexes included in this issue. In the author index principal and joint personal and corporate authors are listed along with the title, date, pagination, and language of the document and the accession number. The subject index is composed of three basic elements: 1) terms taken from a controlled vocabulary based on the *Thesaurus of Engineering and Scientific Terms* (LEX-EJC), 2) free terms added as needed, 3) geographic names, generally entered under countries. The terms are listed in a single alphabetical arrangement, along with title (original, translated, abridged, expanded, or supplied), principal author, date, pagination, and language of pertinent documents, and their accession numbers.

When ordering this publication, both Parts 1 and 2 should be ordered, as they are complementary.

# **AUTHOR INDEX**

Of modern machines keep Olympics moving	Ackley, S.F.	Air deployed oceanographic mooring (ADOM)
